

Silen is looking for an

Industrial Designer

Are you passionate about smart technical solutions and eager to create products that make the world quieter and more functional? Join Silen – a fast-growing Estonian company whose office pods are used in over 60 countries. Your keen eye for design and technical creativity will help us make our products more user-friendly and innovative.

At Silen, you will:

- Continuously improve and optimize Silen's products – from concept and 3D modeling to a working physical solution
- Develop modifications and custom solutions, ensuring all technical details are precisely documented
- Support production technically in all product-related areas and collaborate closely with various teams
- Manage and maintain technical product and manufacturing data in the ERP system, contributing to the improvement of internal systems and workflows
- Evaluate the feasibility of design solutions and enhance them continuously

We are looking for someone who:

- Has a technical background and strong experience in a similar role
- Works confidently with 3D design software (e.g., Inventor, SolidWorks, Fusion360, or similar)
- Is interested in design, engineering, and manufacturing solutions
- Preferably has experience working with ERP systems
- Is fluent in both Estonian and English
- Prioritizes clarity and precision in communication and fosters open dialogue, and collaboration
- Shares our solution-oriented mindset – at Silen, we focus on finding answers and making ideas happen

Why Silen?

At Silen, your ideas won't sit in a drawer – they'll go into real production. You'll contribute to shaping a globally recognized product in an innovative field. As our company grows rapidly, we offer unique opportunities for professional development in a supportive, ambitious, and driven team. You're in the right place if you value a dynamic environment, innovation, and challenges. And of course, your contribution will be fairly rewarded.
