

# Silen Bridges Portal

Gaps, united

Groups and meetings differ, sometimes by the hour. Combine these modular arcs to create instant, flexible focus zones.

1 person – ∞

### Brings people together

Social office design helps bring out the best in people. Bridges create natural meeting zones in the office to hang out, exchange ideas, or catch up on a project.

### Enhanced acoustics

Acoustically-enhanced arcs improve sound focus. That's right, even with open sides, sound can be manipulated to serve the goal of a quieter, more focused workspace.

### Innovative design

Engineered by the team that won the NeoCon Innovation Award, in partnership with designer Kai Stania.

### Endless customization

Play around with colors, sitting/standing table modes, and optional features like power sockets, lights, and a TV-mount. These help deliver all kinds of focus zones for morning stand-ups, impromptu chats, and everything in between.

### Plug-and-play

Easy to install and ready to use. Order a no-frills arc, or opt for a version with power and automatic lighting.

### Sustainable

Bridges can last 20+ years and are fully renewable. Fabrics only use SEAQUAL® YARN made from recycled marine plastic. When lights or other bits need replacing, you won't have to buy some large contraption they're embedded in. Only swap the affected thing.

### Inner construction panels

Wood, metal, acoustic foam

### Cover panels

Acoustic panels covered with 100% post-consumer recycled polyester textile including 75% SEAQUAL® YARN made from sea plastic.

### Side trims

covered with 100% post-consumer recycled polyester textile including 75% SEAQUAL® YARN made from sea plastic.

### Plinth

Painted steel, adjustable legs for levelling.

### Electricity and lighting

Optional.

### Fittings colours

White RAL 9003

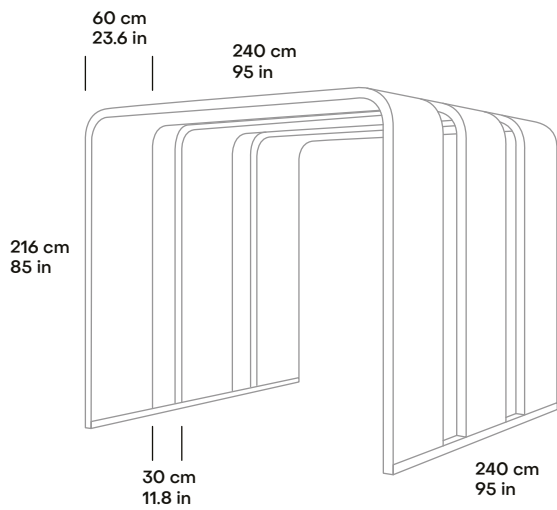

Black RAL 9011

### Textile sides Camira Quest
